Fund Overview	\$158 Net Assets (millions)							

Investment Philosophy and Approach

Under normal conditions, the Fund invests at least 80% of assets in equity securities of companies with small market capitalizations (less than or equal to the largest market capitalization of any company in the Russell 2000 index at the time of purchase).

Screen broad universe of approximately 2,000 small cap stocks based upon:

- Credit worthiness
- Capital investment
- Sales momentum

Approximately 600 companies evaluated by focusing on:

- Life Cycle stage
- Level, trend and sustainability of economic return

Yields a potential buy list of approximately 200 firms that we believe are well managed. A portfolio is constructed after target prices are established and relative attractiveness is considered. Dual diversification by Life Cycle stage and sector are integral to portfolio construction. **Diversification does not assure a profit or protect from loss in declining markets.**

Performance (For periods ended 3/31/2018)

	Quarter	1 Year	3 Years	5 Years	10 Years	Since Inception
IBSCX	2.10%	11.10%	6.53%	9.46%	8.25%	10.70%
Russell 2000® Index	-0.08%	11.79%	8.39%	11.47%	9.84%	10.62%

Performance listed for periods of greater than one year is annualized. Past performance does not guarantee future results. The performance data quoted represents past performance. The principal value of an investment and investment return will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance current to the most recent month end may be lower or higher than the performance quoted and may be obtained by calling 877-861-7714.

Mutual fund investing involves risk; principal loss is possible. The fund invests in smaller companies, which involve additional risks such as limited liquidity and greater volatility.

All performance assumes reinvestment of dividends and capital gains.

The Russell 2000 Index measures the performance of the 2,000 smallest companies in the Russell 3000 Index. The Russell 3000 Index measures the performance of the 3,000 largest U.S. companies based on total market capitalization. The index does not reflect investment management fees, brokerage commissions, or other expenses associated with investing in equity securities. A direct investment in an index is not possible.
